

Mishiko Aspanidze

Frontend Developer

 mishikoaspanidze1999@gmail.com  +995 592 69 71 00  Georgia, Tbilisi  LinkedIn  GitHub

Summary

Junior Web Developer, energetic and motivated, with practical experience in **HTML, CSS, JavaScript, React, and Next.js**. Quickly learns new technologies, approaches problem-solving with dedication, and aims to deliver high-quality, efficient web applications.

Technical Skills

- Frontend: HTML5, CSS3, JavaScript (ES6+), React, Next.js, Tailwind CSS
- Databases: PostgreSQL
- Tools & Platforms: Git, GitHub, VS Code, Figma
- Other Skills: Responsive design, REST APIs, Component-based architecture, Debugging

Projects

itsupporthub

- **IT Support Hub** – Web Application (Next.js + Support Ticket System)
- Developed a clean and efficient help-desk web platform using Next.js, allowing users to submit and manage IT support tickets.
- Designed an intuitive and responsive UI to simplify ticket creation, status tracking, and navigation for both end users and support agents.
- Implemented real-time feedback and form validation to ensure smooth user experience and data integrity.
- Architected a scalable backend architecture to handle user consent, data routing, and potential integrations with support team workflows.

VibeLoop

Premium Music Player – Next.js, Supabase, React

- Built a full-featured music streaming web app with **upload, playback, and discovery** functionalities.
- Implemented a **premium music player** with play/pause, skip, repeat, volume control, and **real-time audio visualizer** using the Web Audio API.
- Features include: uploading new tracks, viewing **new songs**, playlist queue, and interactive player controls.

Work Experience

UltraMovies

- Developed and maintained the front-end of a movie streaming website using modern web technologies.
- Implemented UI components for browsing, searching, and viewing movie titles.
- Optimized responsive design to ensure usability across desktop and mobile devices.
- Collaborated with backend developers to integrate API data for movie listings.
- Improved page load performance and user experience through efficient code and asset management.

easydine

- Developed the front-end of the EasyDine platform, creating user interfaces for browsing and ordering.
- Implemented fully responsive design, optimizing the site for mobile and tablet devices.
- Designed and built UI components, including menus, search bars, product listings, and detail views.
- Integrated with APIs to fetch and display data (e.g., dishes, categories) for users.
- Improved user experience and UI performance through CSS/JavaScript optimizations.

Georgia-IT-Helpers

- Developed and maintained the front-end of the Georgia IT Helpers website, ensuring a clean and professional UI.
- Implemented responsive design to ensure usability across both desktop and mobile devices.
- Created key components such as support request forms, service listings, and informational pages.
- Integrated with APIs to fetch and display data (e.g. services, contact information, support categories).
- Collaborated with backend and design teams to improve the user experience and site performance.
